

ERP SYSTEM

FOR

SWISSTEX GROUP LTD

## **What is an ERP system?**

How can these solutions manage organizations day-to-day business activities, such as accounting, finance, procurement, project management, supply chain, and manufacturing.

Enterprise resource planning systems are complete, integrated platforms, either on-premises or in the cloud, managing all aspects of a production-based or distribution business. Furthermore, ERP systems support all aspects of financial management, human resources, supply chain management, and manufacturing with your core accounting function.

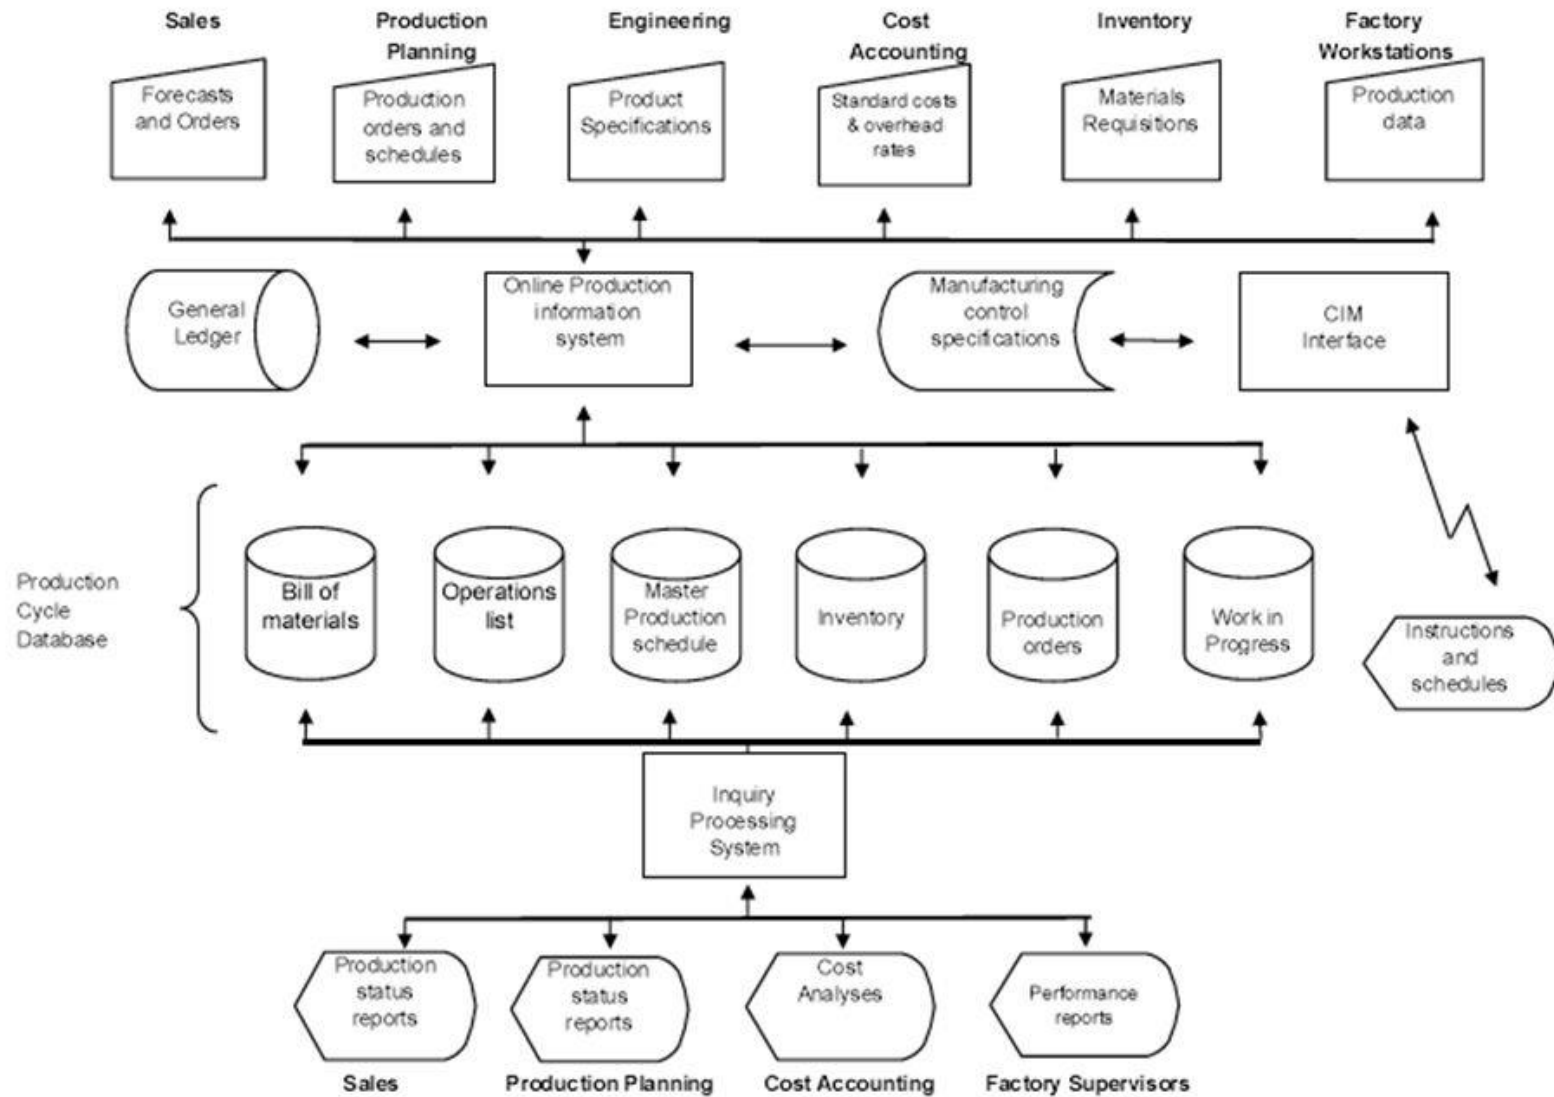

ERP systems will also provide transparency into your complete business process by tracking all aspects of production, logistics, and financials. These integrated systems act as a business's central hub for end-to-end workflow and data, allowing a variety of departments to access.

ERP Systems and software support multiple functions across the enterprise, mid-sized, or small businesses, including customizations for your industry.

## **Our ERP System?**

We Have built an ERP System for Swisstex Group Ltd. We Covered all the requirements as per their management decision.

## L/C Current Status

The screenshot displays the 'L/C Receiving List' window from Swiss Tex ERP. At the top, there are search filters for Invoice No., Customer, Order No., LC NO., LC Date, Status, and Action, along with a 'Search' button. Below these is a table with columns: CI No., Reg. Date, Customer Name, LC NO, LC Date, PI, LC Value, Delivered Value, Last Delivered, Status, Submission Date, and Action. The table contains multiple rows, each starting with 'ST'. A large yellow rectangular box is overlaid on the center of the table, containing the text 'Options to Keep Track of L/C's and Print Them for Further Processing' in a bold, black font. On the right side of the table, next to each row, there is a dropdown menu labeled 'Please Select'. The bottom status bar shows 'Mor' and a date field.
